Web Developer Summary

Web developer with strong knowledge in HTML5, CSS3 and Javascript as well a good foundation on React.js framework.

- Graduate of Juno College of Technology Web Development Bootcamp specializing in HTML5, CSS3, JavaScript and React.
- Built multiple web applications using RESTful APIs such as the TMDB API, pokéAPI, Unsplash API and Rijksmuseum API.
- Created a Pokédex web application through pair programming
- Responsible for gathering user input and displaying results in Magnetic Poetry project.

Projects

URL Shortener   GitHub | Live

HTML5 | CSS3 | Sass | Javascript | API

Web application created with HTML, CSS and JavaScript using assets from **Frontend Mentor**,
- Website clone of provided design format
- Integration of shrtcode API to shorten user links
- Implementing browser storage so user's shortened links would be saved locally

Valorant Sprays   GitHub | Live

React | CSS3 | Sass | API

Web application created using React concepts and using the Valorant-API.
- Pressing button would display a random image/GIF provided by the API.
- Pressing again would clear the previous image/GIF and display a new one.

Magnetic Poetry   GitHub | Live

React | CSS3 | Sass | API

Web application created in a team environment using React concepts, Firebase, and working with the Datamuse API.
- Users submit a theme word which would display similar words to the theme.
- Users can create a poem using these words and with prefixes and suffixes.
- Users post the poem onto a gallery where created poems are displayed.

Employment History

Sunshine Adventures

2014 - 2018 (Seasonal)

- Senior Camp Counselor for children's summer camp.
- Responsible for designing and organizing camp program logistics for over 100 children across a wide age range.
- Monitored and provided care for children when needed
- Ensure the health and safety of all camp participants at all times.
